

# How USMCA Helps America's Farmers

The USMCA is supported by the American Farm Bureau and farmers across the country. That's because this modern trade agreement will provide new access to American agricultural products while **protecting farmers from unfair labor and environmental practices in other countries.**

## NEW PROTECTIONS AND ACCESS FOR FARMERS

The plan opens up Canadian markets to American dairy products after **years of unfair practices.**

This new provision will ensure that more U.S. milk and cheese can be **sold without unfair tariffs.**

Under current law, many U.S. products are subject to Canadian tariffs as high as **313.5%**. The USMCA will vastly increase the amount of dairy, poultry, and eggs that can be exported from the U.S. to Canada without being subject to these tariffs.

The USMCA will increase the amount of tariff-free egg products sold to Canada by **600%** (1.67 million to 10 million dozen eggs).

## USMCA AND AGRICULTURE BY NUMBERS

THIS DEAL WILL ALLOW AMERICAN FARMERS TO ACCESS

**\$39 BILLION**
